---

Our summary email didn't actually ask for a reply, so no real delay on your part.

Mike,

We will get back you shortly regarding the meeting summary and the sediment traps. Apologies for the delay, I was out of the office Friday and Monday so I am catching up a bit.

**Subject:** 9/30 Meeting Summary

Hunter,

We are working on the formal response to EPA's comments on the draft PDI work plan and would like to confirm that the meeting summary/tentative agreements Eron Dodak sent you on 10/2 is consistent with your understanding of the outcome of our discussions. Also, we would like to add an additional element to the Work Plan. We would like to deploy sediment traps or some other sediment/contaminant transport monitoring devices along the upstream boundary of the Arkema area to gather data for the sufficiency assessment. We will provide more details in the response to comment submittal. Please let us know if you the meeting summary looks okay and if you any concerns with adding upstream sediment monitoring to the PDI, to the extent that you can comment before seeing the details.

Thanks,

Michael Pinto
